OSEAN

Keeping track of scuba diving data and logged dives is essential for divers to document their underwater adventures. OSEAN is a web design project created by Angie and Richan, two members of the DG-Meteor team who are also divers. This project aims to transform traditional paper diving logs into a creative digital format. It maintains accurate data of the diving experience while allowing creativity to flow among the logs by incorporating infographics, fun illustrations, and animations. This enables divers to store and share their diving journeys without being restricted by geographic boundaries.

EXPERIENCES ABOUT THIS DIVING TRIP

CATALINA ISLAND 2023/04/08

Catalina Island, CA was truly out of this world! The underwater realm revealed its hidden treasures, and the excitement and awe-inspiring moments. Catalina Island was a mesmerizing wonderland. Swimming through the lush, colorful vegetation felt like a fairytale. The vibrant hues and swaying fronds created a magical ambiance that will forever be etched in my memory. Catalina Island exceeded all my expectations. It was a surreal experience that transported me to a different world. The sense of wonder and gratitude. I can't wait to return to this underwater paradise and unravel more of its secrets.

One of the coolest parts? We saw lots of sharks hanging around the wreck! The Duane sits upright starting at around 50 feet and going deeper. You can swim through the corridors of the ship and see life living in and around the wreck—colorful fish, corals, sponges, and, yes, those impressive sharks.

Overall, diving at the Duane is an awesome experience. It's like exploring an underwater world of wonders. Plus, spotting sharks adds an extra thrill to the adventure.
