

My Home

Virtual Social Identity: Users engage via custom avatars for real-time, cross-spatiotemporal interaction. Family members can collaboratively develop and manage their shared outdoor environments.

Family Spatial Matrix: Using an isometric pixel style, the UI presents a panoramic home exterior alongside private rooms. Navigation is seamless via the member avatar bar at the top.

Functional Portals: Indoor furniture acts as interactive gateways. Clicking items like desks or beds triggers a direct jump to tasks or mini-games, blending intuitive navigation with gamified engagement.
